Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 6, 8, 9 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Provost et al (U.S. Patent No. 4,757,837). The patent to Provost et al discloses a float type steam trap comprising a casing (10) having a float chamber, a float (15) provided in the float chamber, a valve seat (13b), and a valve element (13a) which slides with respect to the valve seat in association with the up-and-down movement of the float so as to be able to open and close the valve seat. The valve seat is made of metal. The valve element is coated with a layer of "Stellite," col. 5, lines 23-32. The valve seat and valve element thus inherently are formed of materials having different wear resistance, with the valve element having a higher resistance to wear due to the coating of Stellite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3753

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Provost et al. It would have been an obvious reversal of parts to coat the valve seat with "Stellite" so that the valve seat has a greater resistance to wear than the valve element.

Allowable Subject Matter

Claims 4, 7 and 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Dunn (U.S. Patent No. 2,117,056) is cited for the additional showing of a float type steam trap.
